

MODULE NAME:	MODULE CODE:
BUSINESS ANALYSIS 3B	BUSA7312/p

ASSESSMENT TYPE: POE (PAPER ONLY)

TOTAL MARK ALLOCATION: 300 MARKS

TOTAL HOURS: A MINIMUM OF 45 HOURS IS SUGGESTED TO COMPLETE THIS ASSESSMENT

By submitting this assignment, you acknowledge that you have read and understood all the rules as per the terms in the registration contract, in particular the assignment and assessment rules in The IIE Assessment Strategy and Policy (IIE009), the intellectual integrity and plagiarism rules in the Intellectual Integrity and Property Rights Policy (IIE023), as well as any rules and regulations published in the student portal.

INSTRUCTIONS:

1. ***No material may be copied from original sources, even if referenced correctly, unless it is a direct quote indicated with quotation marks. No more than 10% of the assignment may consist of direct quotes.***
2. ***Please ensure that you submit your assignment through Turnitin. Please make sure you attach a similarity report to your PoE if you are required to submit a hard-copy of your PoE.***
3. ***Make a copy of your assignment before handing it in.***
4. ***Assignments must be typed unless otherwise specified.***
5. ***Begin each section on a new page.***
6. ***Follow all instructions on the PoE cover sheet.***
7. ***This is an individual assignment.***

Referencing Rubric

Providing evidence based on valid and referenced academic sources is a fundamental educational principle and the cornerstone of high-quality academic work. Part of achieving this quality is referencing in a way that is consistent and congruent with the requirements of the referencing style being used.

Therefore, inconsistent and/or incongruent referencing will result in a penalty of **a maximum of ten percent being deducted from the overall percentage** awarded to your assessment submission.

Please note that **evidence of plagiarism** in the form of copied or unreferenced work, absent reference lists, or exceptionally poor referencing **may result in action being taken in accordance with The IIE's Intellectual Integrity and Property Rights Policy (IIE023)**. Similarly, **evidence of excessive AI usage may result in action being taken in accordance with The IIE's Student Conduct, Discipline and Safety Policy (IIE015)**.

Markers are required to provide feedback to students by **circling/underlining the information in the table below that best describes the student's work and by adding constructive commentary where appropriate**. The examples provided are not exhaustive but illustrate the errors.

Deductions

- Where the student's work contains **five or more errors** aligned to the **minor errors column** below, **deduct 5% from the overall percentage**.
- Where the student's work contains **five or more errors** aligned to the **major errors column** below, **deduct 10% from the overall percentage**.
- Where both minor and major errors** (e.g. two minor and three major, etc.) are present, **deduct 10% only** (and not 5% or 15%) from the overall percentage.

Required: Consistent and congruent referencing	Minor errors Deduct 5% from overall percentage. Example: if the response receives 70%, deduct 5%. The final mark is 65%.	Major errors Deduct 10% from the overall percentage. Example: if the response receives 70%, deduct 10%. The final mark is 60%.
Consistency - The correct referencing style for the discipline – i.e., either Harvard, OR APA (for Psychology), OR Law, OR IEEE (for ICT/Engineering) – has been used consistently for all in-text references and in the bibliography/reference list. Concepts and ideas that are quoted and/or paraphrased are referenced consistently throughout. Position of the in-text reference: an in-text reference is positioned consistently where appropriate for every quote and paraphrase.	Minor inconsistencies: - The referencing style used is generally consistent with what is required, but there are one or two changes/errors in the format of in-text referencing and/or in the bibliography/reference list. - For example, page numbers for direct quotes in-text have been provided for one source, but not in another. Or, two book chapters in the bibliography/reference list have been referenced in two different formats. Or, the publication year has been placed after the author name in one bibliography/reference list entry, and after the source title in another, etc. - Concepts and ideas in quotes and/or paraphrases are typically referenced, but a full in-text reference is missing or incomplete from one or two small sections of the work. - Position of the references: in-text references are only given at the beginning and/or end of every paragraph.	Major inconsistencies: - Poor and wholly inconsistent referencing style used in-text and/or in the bibliography/reference list. - Multiple referencing styles for the same source types have been used. - For example, the format for direct quotes in-text and/or book chapters in the bibliography/reference list and/or year of publication in the bibliography/reference list is different across multiple instances. - Concepts and ideas in quotes and/or paraphrases are haphazardly referenced in-text. - Position of the references: in-text references are only given at the beginning or end of large sections of work.
Feedback on referencing consistency:		
Congruency Each source reflected within in-text references is included accurately in the bibliography/reference list. - All bibliography/reference list entries are in the required order for the referencing style used (e.g. alphabetical, alphabetical under subheadings, numerical). - All direct quotes and paraphrases have been integrated appropriately into the text using introductory phrases, accurate grammar, etc.	Minor incongruities: - There is largely a match between the sources presented in-text and those in the bibliography/reference list, but one or two sources that appear in-text do not appear in the bibliography/reference list, or vice versa. Or key source information is missing from one or two in-text references or bibliography/reference list entries only (e.g. publication year, city of publication, URL date accessed, etc.). - There is a clear and largely accurate ordering of sources in the bibliography/reference list as required by the referencing style used, but with one or two references out of order. - An attempt has been made for source integration into the text using appropriate introductory phrases and grammar, but one or two quotes or paraphrases do not flow as clearly or logically within the sentence structure as they could.	Major incongruities: - No relationship/several incongruities between the in-text referencing and the bibliography/reference list. - For example, multiple sources are included in-text, but not in the bibliography, and/or vice versa. Key source information is missing from multiple in-text references and/or reference list entries. A URL link, rather than the actual reference, is provided in the bibliography. Sources are repeated in the reference list, etc. - Most sources are listed in a haphazard order throughout the bibliography/reference list. - Few to no appropriate introductory phrases or rules of grammar have been applied, and many direct quotes and/or paraphrases feel disconnected from the flow of the text.
Feedback on referencing congruency:		
Overall feedback on referencing, with suggested improvements:		

PoE Instructions

- *Note that this PoE will require that you do independent research: do not limit your work to content in the prescribed material, recommended reading alone, and the lecturer's slides. It is expected that you carry out additional reading and research on appropriate content that will help you present a well-rounded and balanced opinion.*
- **Writing requirements:** *You are advised to use appropriate headers to distinguish between answers for each question.*
 - *Use Arial font type.*
 - *Use a font size of 12 pt for the body of your responses and an appropriate size for the header that will distinguish the headers from the main text.*
 - *Ensure the use of an automatic Table of Contents with the appropriate Headers and the corresponding page number where each section can be found.*
- **Referencing requirements:** *The Harvard style must be used, and submissions must be made through Turnitin.*
- *Ensure you list all sources used to prepare your PoE, and do not add to the reference list any source that is not used.*
- *Ensure you understand the question and pay attention to the marking rubrics to see how you are going to be assessed for this PoE.*
- *You must proofread your PoE for grammatical and typographical errors before submitting, as marks will be deducted for incoherent statements and if there are too many typographical errors detected in your submission.*
- *Do not submit AI-generated text as your own work. Submitting AI-written content without your analysis, synthesis, and critical thinking may be considered plagiarism or academic misconduct.*
- *Do not rely on AI as a primary source. AI responses are not considered credible academic sources—use peer-reviewed journals, books, and official reports instead.*
- *Avoid “copy-paste” practices without meaningful editing or integration of your own ideas.*
- *If you use AI tools in any part of your process (e.g. planning, proofreading), it is advisable to:*
 - *Disclose their use briefly in a footnote or appendix (e.g. “ChatGPT was consulted for initial topic brainstorming only.”).*
 - *Ensure all content is paraphrased, interpreted, and critically evaluated by you.*
- **NB** – *Your lecturer will not mark beyond the maximum word count for the question.*

Part 1 — BUSINESS PROCESS ANALYSIS AND MODELLING**(Marks: 100)****Part 1 instructions:**

1. Submit each part according to the format requirements specified.
2. Ensure all BPMN diagrams follow the correct notation and best practices.
3. Include proper citations and references using the required referencing style.
4. Part 1 Word document (2,800-3,000 words), excluding diagrams.
5. BPMN diagrams must be created using appropriate software (e.g. Visio).
6. Diagrams must be embedded in the document and also submitted as separate files.

Part 1 – Business Scenario

You have been hired as a business analyst consultant for TechSolve, a medium-sized IT company that provides technical support services to corporate clients. The company has been experiencing challenges with their current help desk ticket management process. Clients report delays in ticket resolution, miscommunication between departments, and inconsistent service quality.

The current process works as follows:

1. Clients submit support tickets via email, phone, or a web portal.
2. A customer service agent logs the ticket and assigns a priority level.
3. The ticket is assigned to a technical support agent based on availability.
4. The technical support agent investigates and attempts to resolve the issue.
5. If specialised knowledge is required, the ticket may be reassigned to a senior technician.
6. Once resolved, the ticket is closed, and the client is notified.

Management wants to improve this process to enhance customer satisfaction, reduce resolution time, and optimise resource allocation.

PART 1: QUESTION 1 PROCESS ANALYSIS**(Marks: 30)**

(a)	Identify all stakeholders involved in the help desk ticket management process.	(5)
(b)	Document the current “as-is” process in detail, including decision points and interactions between departments.	(10)

(c)	Analyse the inefficiencies, bottlenecks, and challenges in the current process.	(10)
(d)	Outline key performance indicators (KPIs) that should be measured to determine process effectiveness.	(5)

PART 1: QUESTION 2 PROCESS MODELLING**(Marks: 40)**

In answering the questions, your diagrams must include:

- Proper use of swimlanes to represent different departments/roles.
- Appropriate start and end events.
- Gateways for decision points.
- Message flows between different participants.
- Exception handling for common issues.

(a)	Create a BPMN diagram representing the “as-is” help desk ticket management process.	(20)
(b)	Design an improved “to-be” BPMN diagram that addresses the identified issues.	(20)

PART 1: QUESTION 3 PROCESS IMPROVEMENT JUSTIFICATION**(Marks: 30)**

(a)	Explain the specific improvements in your “to-be” process design.	(10)
(b)	Justify your design choices with reference to BPMN best practices.	(10)
(c)	Describe the expected benefits of your improved process in terms of efficiency, customer satisfaction, and resource optimisation.	(10)

PART 2 — TRANSACTION-BASED PROCESS MODELLING**(Marks: 100)****Part 2 Instructions:**

In answering the questions, your diagrams must include:

1. Submit each part according to the format requirements specified.

2. Ensure all BPMN diagrams follow the correct notation and best practices.
3. Include proper citations and references using the required referencing style.
4. Part 2 Word document (2,800–3,000 words), excluding diagrams.
5. BPMN diagrams created using appropriate software (e.g. Visio).
6. Diagrams must be embedded in the document and also submitted as separate files.

Part 2 – Business Scenario:

MedSupply Inc. is a pharmaceutical distribution company that supplies medication to hospitals, clinics, and pharmacies. The company is implementing a new inventory management system and needs to model its order fulfilment process, which includes complex transaction-based activities.

The order fulfilment process involves:

- Receiving customer orders through an online portal.
- Verifying customer credit and payment terms.
- Checking inventory availability.
- Processing payment (including potential refunds or adjustments).
- Picking, packing, and shipping orders.
- Managing returns and exchanges.

The process must ensure data integrity, handle exceptions appropriately, and comply with the regulations of the pharmaceutical industry. The system needs to manage complex transactions that might require compensation and rollback capabilities.

PART 2: QUESTION 1 TRANSACTION PROCESS MODELLING

(Marks: 40)

(a)	Create a detailed BPMN model of the order fulfilment process, including: - o Order processing - o Payment handling - o Inventory management - o Shipping procedures	(15)
(b)	Incorporate a transaction sub-process with proper compensation handling for payment processing.	(15)

(c)	Include appropriate error handling and exception management for common scenarios like: - o Insufficient inventory - o Payment failures - o Regulatory compliance issues	(10)
-----	---	------

PART 2 QUESTION 2 PROCESS COLLABORATION**(Marks: 30)**

Extend your model to show collaboration between:

(a)	Customer service department.	(10)
(b)	Warehouse operations.	(10)
(c)	Finance department and external payment processors.	(10)

Your model should clearly show message exchanges between these participants and how they coordinate to complete the order fulfilment process.

PART 2: QUESTION 3 TECHNICAL DOCUMENTATION**(Marks: 30)**

(a)	Explain the activity lifecycle considerations in your transaction-based process.	(10)
(b)	Document potential hazards in the transaction sub-process and how they are managed.	(10)
(c)	Discuss how your model addresses: • Data integrity requirements • Compliance with industry regulations • System integration considerations	(10)

Part 3 — BPMN IMPLEMENTATION STRATEGY**(Marks: 100)****Part 3 Instructions:**

In answering the questions, your diagrams must include:

1. Research paper format with proper academic structure.
2. Include proper citations and references using the required referencing style.
3. Part 3 Word document (3,300 -3,500 words).

Business Scenario:

Global Financial Services (GFS), a large financial institution, is planning to implement BPMN across its various departments to standardise process documentation, improve operational efficiency, and facilitate digital transformation initiatives. As a senior business analyst, you have been tasked with developing a comprehensive strategy for BPMN implementation and providing insights into best practices and future trends.

GFS operates in multiple countries, has diverse business units (including retail banking, investment services, insurance, and wealth management), and employs approximately 5,000 staff members. The organisation currently uses various methods for process documentation, resulting in inconsistencies and difficulties in process improvement initiatives.

PART 3: QUESTION 1 TRANSACTION PROCESS MODELING**(Marks: 40)**

(a)	Research and document at least six best practices for BPMN implementation in large financial organisations.	(15)
(b)	Provide practical examples of how these best practices should be applied at GFS.	(15)
(c)	Discuss the consequences of not following these best practices, with specific reference to the financial services context.	(10)

PART 3: QUESTION 2 PROCESS COLLABORATION	(Marks: 15)
---	--------------------

Develop a phased BPMN implementation strategy for GFS that addresses:

(a)	Organisational readiness assessment and preparation.	(5)
(b)	Training and skills development for different stakeholder groups.	(5)
(c)	Process governance framework and standards.	(5)

PART 3: QUESTION 3 TECHNICAL DOCUMENTATION	(Marks: 25)
---	--------------------

(a)	Research and analyse emerging trends in BPMN and process management relevant to the financial services industry.	(10)
(b)	Evaluate how these trends might impact GFS's operations and competitive position.	(5)
(c)	Provide strategic recommendations for how GFS can leverage BPMN as part of its digital transformation journey.	(10)

PART 3: QUESTION 4 TECHNICAL DOCUMENTATION	(Marks: 20)
---	--------------------

You are a business analyst at a medium-sized online retail company that is experiencing challenges with its order fulfilment process. Customers have been complaining about delayed deliveries, incorrect orders, and poor communication. The company's management has asked you to analyse and improve the current process.

(a)	Create a BPMN diagram that models the current order fulfilment process based on the following information: ○ The process begins when a customer places an order online. ○ The system automatically checks inventory availability. ○ If items are available, the payment is processed. ○ If payment is successful, the order is sent to the warehouse for picking and packing.	(10)
------------	---	------

	○ The warehouse team packs the order and prepares it for shipping. ○ The shipping department arranges for courier pickup. ○ The courier delivers the package to the customer. ○ The customer receives the order and the process ends.	
(b)	Identify three potential issues in this process that could be causing the problems reported by customers. For each issue, explain how you would use Business Process Analysis (BPA) techniques to investigate and confirm the problem.	(6)
(c)	Recommend improvements to the process using BPMN concepts discussed in the learning material. Your recommendations should address the identified issues and incorporate at least two of the following: Exception handling Message flows between participants Sub-processes Different types of events	(4)

Assessment Sheet (Marking Rubric)

Please note: Tear off this section and **attach** it to your work when you submit it/ If this is an online submission, then this information needs to be included in the online submission.

MODULE NAME:	MODULE CODE:
BUSINESS ANALYSIS 3B	BUSA7312/P

STUDENT NAME:
STUDENT NUMBER:

PART 1					
PART 1 QUESTION 1: Process Analysis (30 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard	Feedback
(a) Stakeholder identification [5 Marks]	No stakeholders identified or completely incorrect.	Few stakeholders were identified with minimal explanation.	Few stakeholders were identified with minimal explanation, but their roles and interests were clearly explained.	Comprehensive identification of all relevant stakeholders with clear explanations of their roles and interests.	
	0 Marks	1-2 Marks	3-4 Marks	5 Marks	

(b) Documentation of the current process [10 Marks]	Limited description with significant gaps in the process flow.	Basic description of the process with some steps missing or unclear.	A good description of the current process, with most steps and interactions well-documented.	Comprehensive, detailed description of the current process with all steps, decision points and interactions clearly documented.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
(c) Analysis of inefficiencies and bottlenecks [10 Marks]	Superficial analysis with few inefficiencies identified.	Basic analysis with some inefficiencies identified.	Good analysis of inefficiencies with clear identification of major bottlenecks.	Thorough, insightful analysis of inefficiencies with evidence-based identification of root causes and critical bottlenecks.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
(d) KPI identification [5 Marks]	No KPIs identified or completely irrelevant.	Basic KPIs identified with limited rationale.	Good selection of relevant KPIs with appropriate rationale.	Comprehensive set of relevant, measurable KPIs with a clear rationale for each.	
	0 Marks	1-2 Marks	3-4 Marks	5 Marks	

PART 1 QUESTION 2: Process Modelling (40 marks)					
(a) “As-is” BPMN diagram [20 Marks]	Limited diagram with significant notation errors or missing critical elements.	Basic diagram with some notation errors or missing elements.	Good diagram with most elements correctly represented and appropriate use of notation.	Comprehensive, technically correct diagram with all process elements accurately represented using appropriate BPMN notation.	
	0 – 9 Marks	10 – 12 Marks	13 – 14 Marks	15 – 20 Marks	
(b) “To-be” BPMN diagram [20 Marks]	Limited diagram with few meaningful improvements.	Basic diagram with some improvements, but limited innovation.	Good diagram that addresses most issues with appropriate process improvements.	Innovative, technically flawless diagram that effectively addresses all identified issues with optimal process design.	
	0 – 9 Marks	10 – 12 Marks	13 – 14 Marks	15 – 20 Marks	
PART 1 QUESTION 3: Process Improvement Justification (30 marks)					
(a) Explanation of improvements [10 Marks]	Limited explanation with unclear rationale.	Basic explanation of some improvements with limited rationale.	Good explanation of most improvements with adequate rationale.	Comprehensive, detailed explanation of all improvements with clear rationale.	
	0 – 4 Marks	5 Marks	6 – 7 Marks	8 – 10 Marks	

(b) Justification using BPMN best practices [10 Marks]	No reference to BPMN best practice.	Basic justification with limited reference to BPMN best practices.	Good justification with reference to some BPMN best practices.	Thorough justification with explicit reference to multiple relevant BPMN best practices.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
(c) Expected benefits [10 Marks]	No meaningful benefits identified.	Basic analysis of benefits with limited specificity.	Good analysis of benefits with some measurable outcomes identified.	Comprehensive analysis of expected benefits with specific, measurable outcomes for efficiency, customer satisfaction, and resource optimisation.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	

PART 2 TRANSACTION-BASED PROCESS MODELING					
PART 2 QUESTION 1: Transaction Process					
Modelling (40 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard.	Feedback
(a) Order fulfilment process model [15 Marks]	Inadequate or missing model.	Basic model with some errors or missing elements.	A good model with most elements accurately represented.	Comprehensive, technically correct model with all process elements accurately represented.	
	0-5 Marks	6-8 Marks	9-12 Marks	13-15 Marks	

(b) Transaction sub-process with compensation handling [15 Marks]	No transaction sub-process or compensation handling.	Basic implementation with some compensation handling.	Good implementation with appropriate compensation handling.	Technically flawless implementation of transaction sub-process with comprehensive compensation handling.	
	0-5 Marks	6-8 Marks	9-12 Marks	13-15 Marks	
(c) Error handling [10 Marks]	No exception handling implemented.	Basic handling of most specified scenarios.	Good handling of all specified scenarios.	Comprehensive handling of all specified scenarios plus additional relevant exceptions.	
	0 – 4 Marks	5 Marks	6-7 Marks	8-10 Marks	
PART 2 QUESTION 2: Process Collaboration					
(30 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard.	Feedback
(a) Customer service department collaboration [10 Marks]	No customer service collaboration modelled.	Basic modelling with some notation errors.	Good modelling of customer service interactions with appropriate notation.	Comprehensive modelling of customer service interactions with perfect application of collaboration notation.	
	0 – 4 Marks	5 Marks	6-7 Marks	8-10 Marks	

(b) Warehouse operations collaboration [10 Marks]	No warehouse operations collaboration modelled.	Basic modelling with some notation errors.	Good modelling of warehouse operations with appropriate notation.	Comprehensive modelling of warehouse operations with perfect application of collaboration notation.	
	0 – 4 Marks	5 Marks	6-7 Marks	8-10 Marks	
(c) Finance department and external collaboration [10 Marks]	No finance or external collaboration modelled.	Basic modelling with some notation errors.	Good modelling of finance and external interactions with appropriate notation.	Comprehensive modelling of finance and external interactions with perfect application of collaboration notation.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
PART 2 QUESTION 3: Technical					
Documentation (30 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard	Feedback
(a) Activity lifecycle considerations [10 Marks]	Limited explanation with significant gaps. No explanation of lifecycle considerations	Basic explanation of some lifecycle considerations.	Good explanation of most lifecycle considerations.	Comprehensive, insightful explanation of all relevant lifecycle considerations.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	

(b) Transaction hazards documentation [10 Marks]	Limited identification with inadequate management strategies.	Basic identification of some hazards with limited management strategies.	Good identification and management of most hazards.	Thorough identification and management strategies for all potential hazards.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
(c) Addressing technical requirements [10 Marks]	Limited coverage with inadequate solutions.	Basic coverage of some requirements with standard solutions.	Good coverage of most requirements with appropriate solutions.	Comprehensive coverage of all technical requirements with innovative solutions.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	

PART 3 BPMN IMPLEMENTATION STRATEGY					
PART 3 QUESTION 1: Transaction Processing					
Modelling (40 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard.	Feedback
(a) Best practices research [15 Marks]	Limited research with fewer than the required best practices and minimal explanation.	Basic research with most required best practices identified, but with limited explanation.	Good research with six relevant best practices adequately explained.	Comprehensive research with 6+ highly relevant best practices identified and thoroughly explained.	
	0-5 Marks	6-8 Marks	9-12 Marks	13-15 Marks	

(b) Application to GFS [15 Marks]	Limited application examples with minimal relevance.	Basic application examples with limited financial context specificity.	Good application examples for most of the best practices in the financial context.	Innovative, detailed application examples for all best practices, perfectly tailored to the financial context.	
	0-5 Marks	6-8 Marks	9-12 Marks	13-15 Marks	
(c) Consequences analysis [10 Marks]	Superficial analysis with minimal specificity.	Basic analysis with limited financial sector implications.	Good analysis of consequences with some financial sector implications.	Thorough, insightful analysis of consequences with specific financial sector implications.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
PART 3 QUESTION 2: Process Collaboration					
(15 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard	Feedback
(a) Organisational readiness assessment [5 Marks]	Limited assessment with few preparation steps.	Basic assessment with some preparation steps.	Good assessment framework with appropriate preparation steps.	Comprehensive, detailed assessment framework with specific preparation steps.	
	0 Marks	1-2 Marks	3-4 Marks	5 Marks	
(b) Training and skills development [5 Marks]	Limited training approach with minimal detail.	Basic training approach with limited stakeholder differentiation.	Good training strategy for most stakeholder groups with	Thorough, innovative training strategy for all stakeholder	

			appropriate content.	groups with detailed content.	
	0 Marks	1-2 Marks	3-4 Marks	5 Marks	
(c) Process governance framework [5 Marks]	Limited framework with minimal standards.	Basic governance framework with limited detail.	Good governance framework with appropriate standards and roles.	Comprehensive governance framework with detailed standards, roles, and processes.	
	0 Marks	1-2 Marks	3-4 Marks	5 Marks	
PART 3 QUESTION 3: Technical					
Documentation (25 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard	Feedback
(a) Emerging trends analysis [10 Marks]	Limited analysis with minimal evidence.	Basic analysis of some trends with limited evidence.	Good analysis of relevant trends with adequate evidence.	Comprehensive, forward-thinking analysis of multiple relevant trends with strong evidence.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
(b) Impact evaluation [5 Marks]	Superficial evaluation with minimal specificity.	Basic evaluation with limited reference to operations or competitive position.	Good evaluation of impacts with some reference to operations and competitive position.	Thorough, insightful evaluation of potential impacts with specific reference to operations and competitive position.	
	0-Marks	1-2 Marks	3-4 Marks	5 Marks	

(c) Strategic recommendations [10 Marks]	Limited recommendations with unclear alignment.	Basic recommendations with limited alignment to transformation.	Good recommendations with appropriate alignment to digital transformation.	Innovative, practical recommendations with clear alignment to digital transformation goals.	
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
PART 3 QUESTION 4: Technical					
Documentation (20 marks)					
Marking Criteria	Does not meet the required standard	Meets the required standard	Partially exceeds the required standard	Greatly exceeds the required standard	Feedback
(a) BPMN Diagram [10 Marks]	The diagram is disorganised or missing key steps. The sequence is confusing or illogical. Symbols are missing, incorrect, or used inconsistently. No exceptions shown; only the main success path is modelled. The diagram is hard to read; labels	The main steps are included and generally in the correct order. Basic symbols are used appropriately (e.g., tasks, events). At least one exception path is included (e.g., stock unavailable). Tasks are labelled; layout is understandable but may be cluttered.	Most steps are correctly sequenced with minor errors or omissions—correct use of most BPMN elements, with some use of gateways and flows. Two exception paths are included, but may lack clarity or detail. Mostly neat, clearly labelled, and relatively easy to read.	Logical flow of the process from start to end; includes correct sequencing of steps. Appropriate use of BPMN symbols (tasks, events, gateways). Inclusion of alternate paths for stock unavailability or payment failure. Clear labelling, neat layout, and readability of diagrams.	

	are missing or unclear.				
	0-4 Marks	5 Marks	6-7 Marks	8-10 Marks	
(b) BPA Techniques [6 Marks]	Fewer than three issues are irrelevant or vague. No techniques mentioned, or incorrectly applied. Little or no link to the customer complaints	Three basic issues were identified, somewhat relevant. Basic BPA techniques are mentioned, but are generally applicable. A general connection was made between issues and complaints.	Three clear and relevant issues are aligned with process weaknesses. Appropriate BPA tools are explained and logically applied to the issues. There is a clear connection between each issue and its impact on the customer experience.	Three insightful, high-impact issues are directly tied to customer complaints. BPA techniques are expertly selected and thoroughly applied to each issue. Potent and specific linkage to complaints; shows understanding of customer pain points.	
	0-3 Marks	4 Marks	5 Marks	6 Marks	
(c) Strategic recommendations [4 Marks]	Recommendations are off-topic or unrelated to the problems. BPMN concepts are either missing or misapplied. Recommendations are vague or unsupported.	Recommendations are relevant to the problems, but not clearly linked. One concept is used correctly, and two are mentioned vaguely. Explanations are basic, with limited reasoning.	Improvements mostly resolve the identified issues with some logic. Two BPMN concepts are used effectively, but could be more detailed. Most recommendations are explained with sound reasoning.	Clear, practical, and directly aligned to the process issues and customer complaints. Two or more BPMN concepts are applied expertly, enhancing the process in a logical manner. All recommendations are clearly	

				articulated and well-justified with sound business reasoning.	
	0 - 1 Marks	2 Marks	3 Marks	4 Marks	

[TOTAL MARKS: 300]
