

MODULE NAME:	MODULE CODE:
BUSINESS ANALYSIS 3A	BUSA7311

ASSESSMENT TYPE:	ASSIGNMENT 1 (PAPER AND MARKING RUBRICS)
TOTAL MARK ALLOCATION:	100 MARKS
TOTAL TIME:	10 HOURS

By submitting this assignment, you acknowledge that you have read and understood all the rules as per the terms in the registration contract, in particular the assignment and assessment rules in The IIE Assessment Strategy and Policy (IIE009), the intellectual integrity and plagiarism rules in the Intellectual Integrity and Property Rights Policy (IIE023), as well as any rules and regulations published in the student portal.

INSTRUCTIONS:

1. **No material may be copied from original sources, even if referenced correctly, unless it is a direct quote indicated with quotation marks. No more than 10% of the assignment may consist of direct quotes.**
2. **Your assignment must be submitted through Turnitin.**
3. **Save a copy of your assignment before submitting it.**
4. *Assignments must be typed unless otherwise specified.*
5. *All work must be adequately and correctly referenced.*
6. *This is an individual assignment.*
7. *For group assignments, the group may not exceed four members.*
8. *For group assignments, a peer evaluation component is required, and members of the group may not receive the same final mark. **Ensure that you save a copy of your responses.***
 - 8.1. *Complete your responses in a Word document.*
 - 8.2. *The document name must be your **name.student number.Module Code**.*
 - 8.3. *Once you have completed the assessment, upload your document under the **submission link** in the correct module in arc.*

Referencing Rubric

Providing evidence based on valid and referenced academic sources is a fundamental educational principle and the cornerstone of high-quality academic work. Part of achieving this quality is referencing in a way that is consistent and congruent with the requirements of the referencing style being used.

Therefore, inconsistent and/or incongruent referencing will result in a penalty of **a maximum of ten percent being deducted from the overall percentage** awarded to your assessment submission.

Please note that **evidence of plagiarism** in the form of copied or unreferenced work, absent reference lists, or exceptionally poor referencing **may result in action being taken in accordance with The IIE's Intellectual Integrity and Property Rights Policy (IIE023)**. Similarly, **evidence of excessive AI usage may result in action being taken in accordance with The IIE's Student Conduct, Discipline and Safety Policy (IIE015)**.

Markers are required to provide feedback to students by **circling/underlining the information in the table below that best describes the student's work and by adding constructive commentary where appropriate**. The examples provided are not exhaustive but illustrate the errors.

Deductions

- Where the student's work contains **five or more errors** aligned to the **minor errors column** below, **deduct 5% from the overall percentage**.
- Where the student's work contains **five or more errors** aligned to the **major errors column** below, **deduct 10% from the overall percentage**.
- Where both minor and major errors** (e.g. two minor and three major, etc.) are present, **deduct 10% only** (and not 5% or 15%) from the overall percentage.

Required: Consistent and congruent referencing	Minor errors Deduct 5% from overall percentage. Example: if the response receives 70%, deduct 5%. The final mark is 65%.	Major errors Deduct 10% from the overall percentage. Example: if the response receives 70%, deduct 10%. The final mark is 60%.
Consistency - The correct referencing style for the discipline – i.e., either Harvard, OR APA (for Psychology), OR Law, OR IEEE (for ICT/Engineering) – has been used consistently for all in-text references and in the bibliography/reference list. Concepts and ideas that are quoted and/or paraphrased are referenced consistently throughout. Position of the in-text reference: an in-text reference is positioned consistently where appropriate for every quote and paraphrase.	Minor inconsistencies: - The referencing style used is generally consistent with what is required, but there are one or two changes/errors in the format of in-text referencing and/or in the bibliography/reference list. - For example, page numbers for direct quotes in-text have been provided for one source, but not in another. Or, two book chapters in the bibliography/reference list have been referenced in two different formats. Or, the publication year has been placed after the author name in one bibliography/reference list entry, and after the source title in another, etc. - Concepts and ideas in quotes and/or paraphrases are typically referenced, but a full in-text reference is missing or incomplete from one or two small sections of the work. - Position of the references: in-text references are only given at the beginning and/or end of every paragraph.	Major inconsistencies: - Poor and wholly inconsistent referencing style used in-text and/or in the bibliography/reference list. - Multiple referencing styles for the same source types have been used. - For example, the format for direct quotes in-text and/or book chapters in the bibliography/reference list and/or year of publication in the bibliography/reference list is different across multiple instances. - Concepts and ideas in quotes and/or paraphrases are haphazardly referenced in-text. - Position of the references: in-text references are only given at the beginning or end of large sections of work.
Feedback on referencing consistency:		
Congruency Each source reflected within in-text references is included accurately in the bibliography/reference list. - All bibliography/reference list entries are in the required order for the referencing style used (e.g. alphabetical, alphabetical under subheadings, numerical). - All direct quotes and paraphrases have been integrated appropriately into the text using introductory phrases, accurate grammar, etc.	Minor incongruities: - There is largely a match between the sources presented in-text and those in the bibliography/reference list, but one or two sources that appear in-text do not appear in the bibliography/reference list, or vice versa. Or key source information is missing from one or two in-text references or bibliography/reference list entries only (e.g. publication year, city of publication, URL date accessed, etc.). - There is a clear and largely accurate ordering of sources in the bibliography/reference list as required by the referencing style used, but with one or two references out of order. - An attempt has been made for source integration into the text using appropriate introductory phrases and grammar, but one or two quotes or paraphrases do not flow as clearly or logically within the sentence structure as they could.	Major incongruities: - No relationship/several incongruities between the in-text referencing and the bibliography/reference list. - For example, multiple sources are included in-text, but not in the bibliography, and/or vice versa. Key source information is missing from multiple in-text references and/or reference list entries. A URL link, rather than the actual reference, is provided in the bibliography. Sources are repeated in the reference list, etc. - Most sources are listed in a haphazard order throughout the bibliography/reference list. - Few to no appropriate introductory phrases or rules of grammar have been applied, and many direct quotes and/or paraphrases feel disconnected from the flow of the text.
Feedback on referencing congruency:		
Overall feedback on referencing, with suggested improvements:		

Question 1**(Marks: 50)**

Read the case study below and answer questions 1.1 and 1.2.

Adaptive's client is a leading chemical company, which specializes in providing protective coating solutions to various industries. The company has been in business for more than 50 years and has grown significantly, both in terms of revenue and size of the organization. As the client lacked in-house software development capabilities, it outsourced its core system development to another leading software development company. However, the software development company had very little domain knowledge, and the client has very little capability to provide the right requirements to the outsourced development partner.

The resulting solution was highly unusable, leading to significant loss to the client and considerable friction with the outsourced development partner. The management realized that the lack of business analysis capabilities is hurting its progress, and that needed to be addressed. After analysing the situation, the management decided to implement a business analysis practice in the organization to streamline operations and improve efficiency.

The implementation of the business analysis practice resulted in the following benefits: Increased Productivity: Bringing in business analysis and software development in-house resulted in increased development speed with a significant reduction in the time taken to complete tasks. Cost Reduction: Having an in-house team business analysis team resulted in a significant reduction in costs, with a significant decrease in the time taken to complete tasks. Improved Quality: The implementation of business analysis processes and tools improved the quality of the products developed by the company, resulting in increased customer satisfaction.

Enhanced Communication: The implementation of business analysis practice improved communication within the organization, resulting in increased stakeholder collaboration and teamwork. Improved Employee Motivation: The implementation of business analysis practice improved employee satisfaction as the existing Domain SMEs got opportunities to work on enterprise system development projects.

Adaptive (2023) 'Setting up business analysis practice for a large paint manufacturer', 4 October. Available at: [Setting up business analysis practice for a large paint manufacturer \(adaptiveus.com\)](https://adaptiveus.com/). [Accessed on 28 January 2024].

Q.1.1	Examine the difficulties the company encountered as a result of a lack of expertise in business analysis and assess how applying business analysis techniques helped to resolve these problems. Use particular case study examples to demonstrate the significance of business analysis.	(30)
Q.1.2	Consider the organisational effects and implementation process of implementing a business analysis practice critically, using the Adaptive Client case study as a guide. Give a detailed explanation of the procedures needed to implement business analysis and the resulting impacts on the company.	(20)

Question 2**(Marks: 30)****Read the case study below and answer question 2.**

South Africa has the highest number of Covid-19 cases on the African continent. It has more than 500 000 reported deaths. This may be an underestimate, looking at excess death statistics. The economic cost of the pandemic is evident on the streets and healthcare facilities have been under considerable strain during the waves of the pandemic. It was with much relief, elation, and a renewed sense of hope that many healthcare workers enrolled in the Johnson and Johnson vaccination trial mid-February and received their much-anticipated vaccination.

But the relief and elation has given way to frustration and disillusionment.

The country's rollout is proceeding at a pace much slower than expected. To date just over 293,000 South Africans have had their jab, which represents only a fraction of the 1,25 million healthcare workers who are first in line. This adds up to about 0.5% of the general population. The initial target of having 67% of the country's citizens vaccinated by the end of 2021 is now unlikely to be achieved. At the current vaccination pace, it will take over a decade for South Africa to reach herd immunity, with many lives lost along the way.

Amongst other issues, an additional factor was South Africa's slow start. The government has been criticised for not actively engaging in vaccine procurement through other avenues at an earlier stage. On top of this, there has been a series of problems with vaccines South Africa managed to secure. And the evolution of new variants and uncertainties around the efficacy of vaccines to emerging variants has slowed the country's efforts to overcome this pandemic through prevention.

Another big issue that is likely to slow down the momentum of the country's vaccination programme is vaccine mistrust. In a survey done by the University of Johannesburg, up to a third of South Africans said that they would refuse a COVID-19 vaccine if it was offered to them.

This could be echoing a deterioration in trust in the handling of the pandemic. Misinformation, exaggeration, and de-contextualisation of facts on various social media platforms have led to a large degree of vaccine mistrust among people. Aside from conspiracy theories and grossly inaccurate misrepresentations of facts, there is an increasing mistrust in science, pharmaceutical companies, and authorities.

Balancing efficacy, safety, storage requirements and sustainability when it comes to vaccine selection is no easy task. But some countries have managed it better than others. South Africa is one of the countries that is lagging far behind. The human and economic cost of passively allowing the pandemic to run its course in an era where vaccines are available is unacceptable.

In addition, the emergence of variants is a compelling reason to step up vaccination efforts. Suboptimal levels of immunity will mean more people get ill and die. It will also increase the likelihood of new variants emerging. The South African government needs to shift gear on several fronts. It needs to make vaccine procurement a budget priority and procure more vaccines.

Secondly, it needs to clarify urgently what the requirements are for the involvement of private medical providers in the vaccine rollout. It also needs to expand the number of platforms (such as local clinics, GP practices, pharmacies, and private and state facilities) on which the vaccines are rolled out. If ever there was a need for public-private collaboration it is now – both in terms of funding vaccines and in providing platforms. This would enable large-scale vaccination to occur at the pace needed to turn the tide against COVID-19 in South Africa. The government also needs to do more to raise public awareness and dispel myths at community level. Clearly this will have to be a collaborative effort between all stakeholders – from international efforts for equity, to engagement by the pharmaceutical industry, procurement by government, the involvement of private sector players and widespread information and education of the public.

The Conversation (2021) 'The reasons South Africa's COVID-19 vaccine programme looks bleak', 26 April. Available at: [The reasons South Africa's COVID-19 vaccine programme looks bleak \(theconversation.com\)](https://theconversation.com/the-reasons-south-africa-s-covid-19-vaccine-programme-looks-bleak-158484). [Accessed on 28 January 2024].

Q.2.1	Examine the COVID-19 vaccination rollout case study in South Africa, paying particular attention to the crucial stakeholder management issues that need to be resolved in order to speed up the immunisation programme. Examine matters concerning a range of stakeholders, including the general public, medical experts, pharmaceutical companies, government agencies, and for-profit hospitals. Examine issues with vaccination scepticism, purchasing, and public awareness; suggest tactics for productive stakeholder cooperation. Create a plan of action and give a thorough explanation for it, backed up with facts and observations from the case study.	(30)
--------------	--	------

Question 3**(Marks: 20)****Provide your answer in essay form.**

Examine how elicitation planning, processes, and the crucial role that documentation and confirmation play in business analysis work together. Talk on important aspects of elicitation preparation, techniques, and show how documenting improves process efficacy.

Describe your points with instances from everyday life. Students must take a stance and defend it.

Please note: Attach this rubric to your work when you submit your Assignment. This information needs to be included in the online submission.					
MODULE NAME:				MODULE CODE	
BUSINESS ANALYSIS				BUSA7311/p	
STUDENT NAME:					
STUDENT NUMBER:					
Marking Criteria Q.1.1. (30 Marks)	Greatly exceeds the required standard. (26-30 Mark)	Partially exceeds the required standard. (17-25 Marks)	Meets the required standard. (9-16 Marks)	Does not meet the required standard. (0-8 Marks)	Mark allocation and feedback
Q.1.1. Understanding of Difficulties	Presents a comprehensive and insightful analysis of the challenges faced by the company due to a lack of business analysis expertise, demonstrating a profound understanding of the issues.	Provides a clear and thorough examination of the difficulties encountered by the company, showing a solid understanding of the challenges.	Offers a basic exploration of the difficulties but lacks depth or insight.	Fails to adequately identify or understand the challenges faced by the company.	
Evaluation of Business Analysis Techniques	Provides a detailed and sophisticated assessment of how business analysis techniques were applied to address the identified difficulties, showcasing a nuanced understanding of the effectiveness of these techniques.	Conducts a solid evaluation of how business analysis techniques helped in resolving the problems, demonstrating a good grasp of their impact.	Presents a somewhat basic evaluation of the application of business analysis techniques, with limited depth or insight.	Fails to provide a meaningful evaluation of how business analysis techniques contributed to resolving the problems.	
Use of Case Study Examples	Effectively employs specific case study examples to illustrate and support key points, enhancing the depth and credibility of the analysis.	Uses relevant case study examples to support key arguments, providing additional context to the discussion.	Attempts to incorporate case study examples, but they may lack relevance or specificity.	Does not use case study examples or uses irrelevant examples that do not contribute to the discussion.	
Argument and Justification	Presents a compelling argument with thorough justification and substantiation of positions. Effectively supports claims with evidence and analysis.	Provides a solid argument with adequate justification and support for positions. Presents reasonable evidence and analysis.	Presents a basic argument, but the justification and support for positions may be limited or lack depth.	Fails to present a coherent argument or lacks any meaningful justification for positions.	

Clarity and Organisation	Presents ideas in a clear, well-organised manner with a logical flow of information. Each point is well-supported and contributes to the overall coherence of the response.	Demonstrates clear organisation with a logical structure, but some points may lack elaboration or clarity.	Presents ideas in a somewhat disorganised manner, making it challenging for the reader to follow the argument.	Lacks clear organisation, making it difficult for the reader to understand the main points and their relationships.	
Overall Presentation	The response is well-written, with proper grammar, spelling, and sentence structure. It engages the reader and effectively communicates the ideas.	The response is generally well-written but may contain occasional errors in grammar, spelling, or sentence structure. Communication of ideas is clear.	The response may contain numerous errors in grammar, spelling, or sentence structure, impacting clarity.	The response is poorly written, with significant errors that hinder understanding.	
Marking Criteria Q.1.2. (20 Marks)	Greatly exceeds the required standard. (18-20 Marks)	Partially exceeds the required standard. (13-17 Marks)	Meets the required standard. (6-12 Marks)	Does not meet the required standard. (0-5 Marks)	Mark allocation and feedback
Q.1.2. Understanding of Implementation Process	Demonstrates an exceptional understanding of the procedures involved in implementing a business analysis practice, providing a comprehensive and detailed explanation.	Displays a strong understanding of the implementation process, offering a detailed explanation of the necessary procedures.	Presents a basic understanding of the implementation process, with some key procedures explained, but lacking depth.	Fails to adequately demonstrate a clear understanding of the implementation process.	
Analysis of Organizational Effects	Conducts a thorough and insightful analysis of the organizational effects resulting from the implementation of the business analysis practice, showcasing a nuanced understanding of the impacts.	Provides a solid analysis of the organizational effects, demonstrating a good grasp of the impacts on the company.	Offers a somewhat basic analysis of the organizational effects, with limited depth or insight.	Fails to provide a meaningful analysis of the organizational effects.	
Use of Case Study Examples	Effectively employs specific case study examples to illustrate and support key points, enhancing the depth and credibility of the analysis.	Uses relevant case study examples to support key arguments, providing additional context to the discussion.	Attempts to incorporate case study examples, but they may lack relevance or specificity.	Does not use case study examples or uses irrelevant examples that do not contribute to the discussion.	

Critical Reflection	Provides a well-developed and critical reflection on the implementation process and its effects, offering insightful observations and thought-provoking analysis.	Presents a solid critical reflection, with thoughtful observations on the implementation process and its effects on the organisation.	Includes a basic critical reflection but lacks depth or original insights.	Fails to provide a meaningful critical reflection on the implementation process and its effects.	
Marking Criteria Q.2 (30 Marks)	Greatly exceeds the required standard. (26-30 Mark)	Partially exceeds the required standard. (17-25 Marks)	Meets the required standard. (9-16 Marks)	Does not meet the required standard. (0-8 Marks)	Mark allocation and feedback
Q.2. Stakeholder Analysis	Presents a comprehensive and insightful analysis of stakeholder management issues, demonstrating a deep understanding of various stakeholders' concerns and their impact on the vaccination rollout.	Provides a solid analysis of stakeholder issues, addressing key concerns and their relevance to the immunization program.	Offers a basic analysis of stakeholder issues but may lack depth or insight into their impact on the vaccination rollout.	Fails to adequately analyse stakeholder management issues.	
Examination of Specific Stakeholders	Effectively examines issues related to various stakeholders, including the public, medical experts, pharmaceutical companies, government agencies, and for-profit hospitals, providing detailed insights into their unique challenges.	Examines issues related to specific stakeholders, offering relevant insights into their concerns and roles in the vaccination rollout.	Examines issues related to stakeholders but may lack specificity or depth in addressing their unique challenges.	Fails to adequately examine issues related to specific stakeholders.	
Analysis of Key Issues	Conducts a thorough examination of vaccination scepticism, purchasing challenges, and public awareness issues, providing nuanced insights into their impact on the immunization program.	Provides a solid analysis of key issues, such as vaccination scepticism, purchasing challenges, and public awareness, demonstrating a good understanding of their significance.	Offers a basic analysis of key issues but may lack depth or insight into their impact on the immunization program.	Fails to adequately analyse key issues related to vaccination rollout.	
Suggested Tactics	Proposes well-founded tactics for productive stakeholder cooperation, demonstrating	Suggests reasonable tactics for stakeholder cooperation, showing a	Provides basic suggestions for stakeholder cooperation but may lack creativity	Fails to provide meaningful suggestions for stakeholder cooperation.	

	creativity and a comprehensive understanding of the challenges.	good understanding of potential solutions.	or depth in proposed tactics.		
Action Plan	Develops a detailed and well-thought-out action plan with clear steps and strategies for addressing stakeholder management issues, supported by evidence from the case study.	Creates a solid action plan with reasonable steps and strategies for addressing stakeholder management issues, supported by relevant evidence.	Presents a basic action plan, but may lack clarity, depth, or evidence from the case study.	Fails to provide a coherent or meaningful action plan.	
Justification of the Action Plan	Offers a comprehensive and compelling justification for the action plan, citing relevant facts and observations from the case study to support the proposed strategies.	Provides a strong justification for the action plan, incorporating relevant facts and observations from the case study to support the proposed strategies.	Offers a basic justification for the action plan but may lack depth or relevance to the case study.		
Marking Criteria Q.3 (20 Marks)	Does not meet the required standard. (0-5 Marks)	Meets the required standard. (6-12 Marks)	Partially exceeds the required standard. (13-17 Marks)	Greatly exceeds the required standard. (18-20 Marks)	Mark allocation and feedback
Q.3. Skill: Presentation of the Argument	- No position is stated. - Evidence is unrelated/contradictory. - Anecdotal evidence is used.	- A position is stated, but it is a re-statement of the topic and is not emphasized/or is embedded in the essay. - Some evidence is unrelated to the position. - Could not articulate the relationship between the evidence and the p	- The position is clearly stated from the outset and functions as a conclusion to the essay. - However, the position is not consistently referred to in the essay. - Evidence is consistently relevant. - Did not consistently relate the evidence to the position.	- The position is an original formulation. The entire essay is an integrated position statement, i.e., points are consistently logically linked to form an opinion. - Evidence selection is thoughtful. - The evidence is logically linked. - Some attempt made to dismiss other positions.	
Discussion of Elicitation Aspects	Effectively examines issues related to various stakeholders, including the public, medical experts,	Examines issues related to specific stakeholders, offering relevant insights	Examines issues related to stakeholders but may lack specificity or depth	Fails to adequately examine issues related to specific stakeholders.	

	pharmaceutical companies, government agencies, and for-profit hospitals, providing detailed insights into their unique challenges.	into their concerns and roles in the vaccination rollout.	in addressing their unique challenges.		
Illustration with Real-world Examples	Conducts a thorough examination of vaccination scepticism, purchasing challenges, and public awareness issues, providing nuanced insights into their impact on the immunization program.	Provides a solid analysis of key issues, such as vaccination scepticism, purchasing challenges, and public awareness, demonstrating a good understanding of their significance.	Offers a basic analysis of key issues but may lack depth or insight into their impact on the immunization program.	Fails to adequately analyse key issues related to vaccination rollout.	
Stance and argument	Proposes well-founded tactics for productive stakeholder cooperation, demonstrating creativity and a comprehensive understanding of the challenges.	Suggests reasonable tactics for stakeholder cooperation, showing a good understanding of potential solutions.	Provides basic suggestions for stakeholder cooperation but may lack creativity or depth in proposed tactics.	Fails to provide meaningful suggestions for stakeholder cooperation.	

[TOTAL MARKS:100]
